FLOWERING SHRUBS *from* **STUART'S** IS AN INVESTMENT IN THE FUTURE

SPIREA VAN HOUTTEI

CYDONIA JAPONICA

CREPE MYRTLE

HALL'S HONEYSUCKLE

WEIGELA—EVA RATHKE

By exercising care in selection one can arrange the planting of flowering shrubs so as to have blooms for the entire year. The flower producing shrubs crown the garden with glory. Nearly all have long lives, and a dollar invested in them pays many dollars in dividends of pleasure each year.

ALTHEA (Rose of Sharon). Deep red and purple, very double and the single white Lady Stanley. Blossoms profusely from the time warm weather comes until frost. Very hardy and drought resistant. Grows to ten feet. **Each, 75c; 10 for \$6.00.**

CORAL BERRY (Indian Currant). Very hardy plant of arching growth, foliage velvety green. Insignificant white flowers in early summer, loaded with rose colored berries throughout fall and winter. Decorative in vase or wreath at Christmas Time. 18 to 24 inches. **Each, 50c; 10 for \$4.00.**

CREPE MYRTLE. Red, purple and white. All know the Crepe Myrtle. Who would want their garden to be without this shrub? Hardy and in bloom throughout summer and fall. Beautiful in tree shape or shrub form. 18 to 24 inches. **Each, 50c; 3 for \$1.25; 6 for \$2.40.**

CYDONIA JAPONICA (Rubra). Commonly called the Flowering Quince. This is the most gorgeous of all the early blooming shrubs. Hardy. In late winter and early spring it loads itself with flaming red blossoms which are a glory to behold. Plant what you have room for, as specimens or as hedge. 18 to 24 inches. **Each, 75c; 3 for \$2.25; 6 for \$4.25.**

FORSYTHIA (Golden Bell). Grows to 6 feet, and if not otherwise pruned, this shrub is of arching nature. It bears golden, bell shaped blossoms of medium size in profusion all along the canes before the appearance of leaves, usually about March 1. Several planted in clumps make a gorgeous display. 2 to 3 feet. **Each, 50c; 3 for \$1.25; 6 for \$2.40.**

HONEYSUCKLE (Hall's). This is the best known and most fragrant of the honeysuckles. Evergreen, dark and dense foliage. White flowers changing to golden as they age; last throughout the growing season. 18 to 24 inches. **Each, 50c; 3 for \$1.25; 6 for \$2.40.**

HONEYSUCKLE LONICERA. Grows 5 to 6 feet, Hardy bush. Bears a wealth of creamy white flowerlets of delicate fragrance early in the spring before appearance of leaves. Handsome foliage. 2 to 3 feet. **Each, 75c; 3 for \$2.00.**

HONEYSUCKLE TARTARIAN. Bright pink flowers, followed by red berries in summer and autumn. Reaches height of 6 to 8 feet. 12 to 18 inches. **Each, 50c; 3 for \$1.25.**

JASMINE (Humile). This shrub of trailing or weeping habit of growth is covered throughout the summer with small but showy yellow blossoms. Foliage a little darker than olive. 18 to 24 inches. **Each, 50c; 3 for \$1.25; 6 for \$2.40.**

JASMINE (Winter Blooming). This is similar to the plant described above, but blooms profusely in late winter or spring before the appearance of the foliage. It is a bright and welcome spot in the garden, usually being the first shrub to bloom. 18 to 24 inches. **Each, 50c; 3 for \$1.25; 6 for \$2.40.**

LILAC (Persian). Purple blooms borne in greater profusion than on common lilac. Leaves smaller. Makes beautiful flowering tall hedge. Not inclined to sprout from roots. 2 to 3 feet. **Each, \$1.00; 3 for \$1.75; 6 for \$3.25.**

SPIREA VAN HOUTTEI (Bridal Wreath). Who could resist the arching sprays of this spring blooming shrub? Its beauty of white blossoms is a veritable bank of snow which is beyond description. Plant all you have room for. 18 to 24 inches. **Each, 50c; 3 for \$1.25; 6 for \$2.40.**

WEIGELA (Eva Rathke). Hardy and the most satisfactory of the Weigelas. Bears great numbers of carmen red flowers, commanding in appearance. 2 feet. **Each, \$1.00; 3 for \$2.50; 6 for \$4.50.**

STUART'S GUARANTEE

All nursery stock bought from Stuart Nursery is guaranteed to be free of disease and to reach you in good condition, if shipped by Express or Mail. We cannot assume any responsibility for freight shipments. If for any reason you are not satisfied, please notify us at once after you receive the stock. While all stock is guaranteed to reach you in live condition our responsibility must cease there as we cannot guarantee nursery stock to live as the weather and other conditions after stock is planted are beyond our control. We guarantee to send you stock true to name and if through some error your stock proves untrue to name, it will be replaced free of charge the following season. Under no circumstances are we liable for more than the original cost. We give no warranty, expressed or implied, as to growth or productiveness. Prices are for cash with order and all stock offered is subject to prior sale.

LILAC—PERSIAN

FORSYTHIA

STUART'S 2-YEAR-OLD FIELD GROWN ROSES

Red Bush Roses

ETOILE DE HOLLANDE. Clear crimson of velvety texture, large and fragrant. Good stem. Bush vigorous, free blooming. One of the best everblooming roses.

ROUGE MALLERIN. Scarlet, damask fragrant blooms. A brilliant full petaled rose, 3½ inches. Exquisitely beautiful in the fall.

RED RADIANCE. Rich red in color. Good flower, good bud and the strongest of bushes. Will keep you in bouquets from early until late.

Pink Bush Roses

PINK RADIANCE. Perfect buds, large full flowers of brilliant rose pink. Strong bush and prolific producer. Excellent.

EDITOR McFARLAND. This is a truly beautiful rose of deep, even pink. Hardy. Makes fine cut flower. Petal somewhat curving when open.

BRIARCLIFF. A very lustrous pink. The very long buds make the finest of cut flowers and are borne on long strong stems. Medium growth. Free bloomer.

Yellow Bush Roses

GOLDEN OPHELIA. Clear yellow, fragrant and well formed. Excellent for cutting. Good growth for yellow rose.

ROSLYN. Pure, deep yellow, perfect buds. Hardy bush.

PREPAID PRICES ON STUART'S ROSES

No. 1—Strong, two years old, heavy roots. Each, \$1.00; dozen, \$10.00.

No. 2—Two years old, strong, but smaller than No. 1. Each, 75c; dozen, \$8.00.

MALLERIN

White Bush Roses

KONIGN LOUISE. Hardy bush. Buds and flowers full and beautiful. Clear white. Dependable.

KAISERINE AUGUSTA VICTORIA. The old standby white rose. Exquisite, long pointed buds. Compact and desirable when open. A creamy white rose which has a unique and fascinating fragrance.

Combination Color Bush Roses

TALISMAN. One of the finest of all roses for cutting. A gay combination of red, yellow and orange. Foliage lustrous.

PRESIDENT HOOVER. Color is a soft blending of scarlet, yellow and flame. Large, fragrant, and of beautiful conformation. Bush is very strong and bears profusely.

Climbing Roses

CLIMBING TALISMAN. Pillar. Multicolored blooms similar to bush Talisman. A favorite.

PAUL'S SCARLET. Pillar. In bloom this is truly a spectacle. It's scarlet profusion of breath-taking blooms last for weeks. Fast growing and hardy.

PLANT STUART'S HEAVY BEARING MONEY-MAKING PECAN TREES

Plant pecans for beauty, utility and profit. No other general purpose tree is so highly esteemed. The tree itself is rugged and so enduring that it will not only serve you but also your children and grandchildren, and they will take the same pride of possession which you do.

BURKETT. This Western Variety is the most popular of all pecans and deservedly so. Since introduction it has gained friends faster than all others and continues to do so. There are never enough Burkett's to supply the demand. Tree thrifty and fast growing, heavy producer, and bears when quite young. Favors upland soil. Nuts large and round, very thin shelled, quality and flavor superb. Do not fail to plant the Burkett Pecan.

WESTERN SCHLEY. Trees hardy and make quick growth, beautiful foliage. Especially adapted to area just west of Cross Timber Belt. Long, thin shelled nuts of medium size. You may expect better crops from your Burkett and Mahon if you plant Western Schley with them.

MAHAN. Bears largest nut of all pecans, long and very thin shelled. Fast growing tree with exceptionally large foliage. Paying well in Central Texas. Likes good upland soil but also does well in strong bottom land. Wonderful specimen tree.

POLLINATION OF PECANS

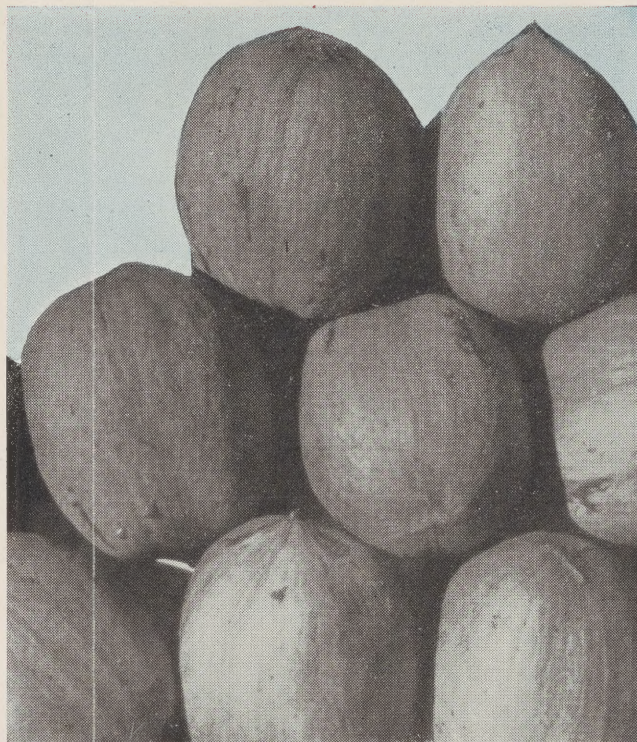

Where you do not have native pecans it is better to plant some early pollen-shedding varieties with late pollen-shedding varieties to insure perfect pollination. Western Schley sheds its pollen early. Burkett and Mahan shed their pollen late.

SIZE OF HOLE FOR PECANS

In ideal pecan soils, use a post-hole digger, making the hole 10 inches wide and from 3 to 3½ feet deep. In hard soils dig a hole 3 feet square and 3 feet deep so that the roots can get started before reaching the hard soil.

DISTANCE FOR PLANTING PECAN TREES

35 ft. by 35 ft. gives 35 trees per acre.
40 ft. by 40 ft. gives 27 trees per acre.
35 ft. by 70 ft. gives 17 trees per acre.
50 ft. by 50 ft. gives 16 trees per acre.
60 ft. by 60 ft. gives 12 trees per acre.

PECANS—BURKETT

SCHLEY. The best of the Eastern Varieties. Tree upright and beautiful, rather late in bearing. Long, thin shelled and perfect cracking, the Schley is often called the perfect nut.

SPRING-FLOWERING BULBS

from **STUART'S**
WILL ADD NEW COLOR
AND BEAUTY TO YOUR
GARDEN And HOME
QUEEN'S WREATH

This beautiful climber is also called Mexican Love Vine. It is one of the most beautiful climbers that grow. A perennial that comes from the root each year. Strong roots. Each, 20c; 6 for \$1.00, postpaid.

TUBEROSE

Grandmother's favorite flower, the Tuberose, best known for its extreme fragrance. The flowers are waxy white, borne on spikes about 2 to 3 feet high. Dozen, 60c; 100 for \$4.00, postpaid.

AMARYLLIS

AMARYLLIS

JOHNSON. Immense blooms of deep velvety crimson with white markings in the throat, often measure 6 inches across. Strong bulbs. Each, 50c; dozen, \$4.50, postpaid.

GLADIOLUS

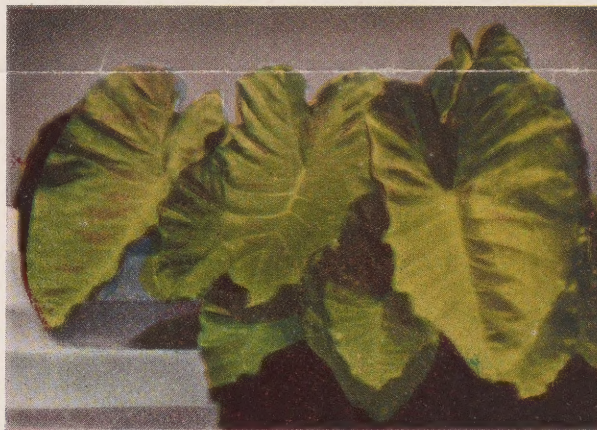

COMMANDER KOEHL. A fine dark scarlet red without any markings or blotches. A sturdy, consistent grower.

MAID OF ORLEANS. Cream-white. The pure white florets have cream throats. Many perfect florets in bloom at once.

MINUET. Beautiful, clear lavender, of good size, strong straight stems. A flower of extreme beauty.

PICARDY. Soft shrimp pink without flecking blotch of light flesh pink shading to shrimp pink at the edges. A most beautiful flower.

Prices on all of the above "Glads": Each, 15c; dozen, \$1.50, postpaid.

CALADIUM

CANNAS

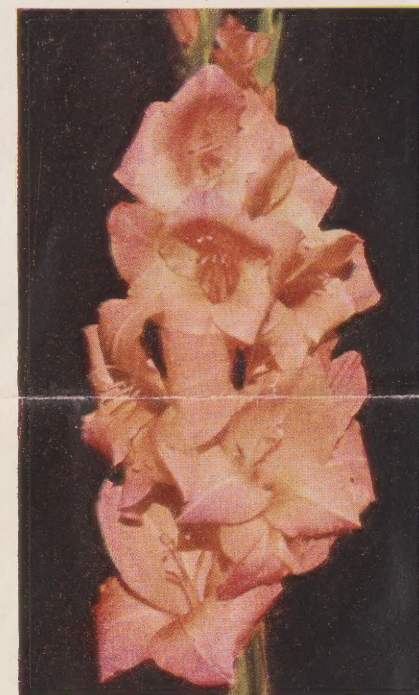

KING HUMBERT. Bright orange scarlet trusses, attractive bronze foliage. A wonderful bedder.

CITY OF PORTLAND. Large rose colored flowers borne on strong canes. Grows about 3 feet high.

THE PRESIDENT. A beautiful red canna with immense trusses of gigantic flame scarlet.

MRS. ANTOINE WINTZER. A solid, unshaded yellow with large firm petaled flowers.

Prices on all cannas: Each, 15c; dozen, \$1.50, postpaid.

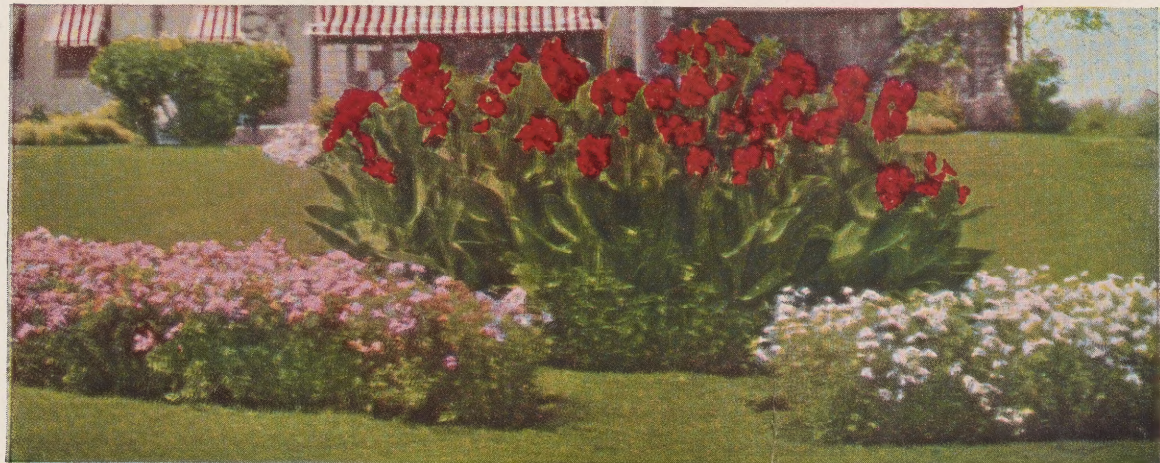

PICARDY

CALADIUM

Often called Elephant Ears due to the immense size of the leaves. Ideal for background. Price: Each, 25c; 6 for \$1.25, postpaid.

A BED OF KING HUMBERT CANNAS

STUART'S BROADLEAF and CONIFEROUS EVERGREENS

There is nothing that more completely finishes the final appearance of your home than a generous planting of evergreens. Plant them around the foundation—make specimens of them—in fact, there are dozens of ways to use them and they are most economical for the pleasure you will derive from them throughout the long dreary winter months when all other plants are dormant. Plant them liberally for the year around, incomparable greenness they give.

BROADLEAF EVERGREENS

NANDINA. Extremely decorative. Thick, upright growth. In the spring and early summer the slender, pointed leaves are bright green, in late summer they begin to redden, by fall they are scarlet. Throughout fall and winter this plant carries a wealth of bright red berries. 8 to 12 inches. Each, 50c; 12 to 15 inches, 75c.

ABELIA GRANDIFLORA. Makes wonderful flowering hedge. Foliage glossy green, flowers star shaped and carried in abundance throughout the summer. 12 to 18 inches. Each, \$1.00; dozen, \$10.00.

EUONYMUS JAPONICA. Hardy and quick growing. May be sheared to any shape or trained as a semi-trailer. Leaves medium large, dark green. 12 to 18 inches. Each, \$1.00.

JASMINE FLORIDUM. Bright green foliage on graceful drooping branches. Small but showy yellow flowers throughout summer. 12 to 18 inches. Each, \$1.25.

IRISH JUNIPER

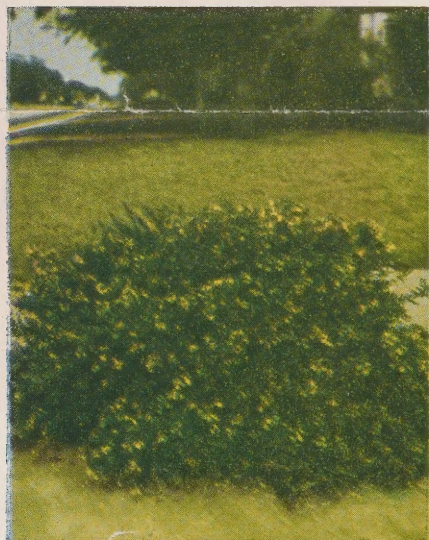

PFITZER JUNIPER

12 to 18 inches, \$1.00; 18 to 24 inches, \$1.25.

All evergreens, both broadleaf and Coniferous listed on this page are quoted BARE ROOT and are postpaid to your door.

For BALLED AND BURLAPPED Evergreens see next page.

ANY FIVE OF OUR \$1.00 EVERGREENS LISTED ON THIS PAGE FOR \$4.50; OR 10 FOR \$8.50, POSTPAID.

JASMINE FLORIDUM

EUONYMUS JAPONICA

CONIFEROUS EVERGREEN

BAKERS ARBORVITAE. Best known of the Arborvitae. Very hardy and fast growing. Pyramidal, tall and compact. 12 to 15 inches. Each, \$1.00.

BERKMAN'S GOLDEN ARBORVITAE. Of medium height, very hardy. Golden color makes it a useful subject where contrast is desired. 12 to 15 inches. Each, \$1.00.

BIOTA BONITA ARBORVITAE. Perfect globe, hardy, foliage dark green. Extreme height 4 feet. Very popular. 9 to 12 inches. Each, \$1.00.

PFITZER JUNIPER. Most satisfactory of the creeping Junipers. Foliage dark green. Height 2 feet, spread 5 feet or more.

IRISH JUNIPER. This evergreen is of slender upright growth and of medium height. Compact branches, grayish foliage, spiny tendency. 12 to 18 inches, each \$1.00; 18 to 24 inches, each \$1.25.

ABELIA

NANDINA

BAKER'S GOLDEN ARBORVITAE

BIOTA BONITA ARBORVITAE

STUART'S TREES

For SHADE and BEAUTY

Trees adapt themselves to many uses—some are planted in memory of a loved one—others are for screening purposes. Why not start a "Red Bud" trail in your community?

BALLED AND BURLAPPED EVERGREENS

NOT PREPAID Both Broadleaf and Coniferous Evergreens are included in this list and most of them are completely described on the left page. **IMPORTANT:** Remit price of plants desired but do not attempt to include shipping costs. These plants will be shipped to you by EXPRESS COLLECT to the express office you indicate. The shipping cost will likely be less than you expect.

ARIZONA CYPRESS. Once established this is one of the hardiest of the Evergreens used in the Southwest. A beautiful tree which grows up to 25 feet. Foliage bluish gray. Its natural growth is spreading but may be kept slender by shearing. 18 to 24 inches, \$1.50; 2 to 3 feet, \$2.00; 3 to 4 feet, \$2.50.

ITALIAN CYPRESS. A tall slender tree of upright growth. A stately tree and very green. Takes very little room but reaches great height. 4 to 5 feet, \$2.00; 5 to 6 feet, \$2.50; 6 to 8 feet, \$3.00.

ANDORRA JUNIPER. Hardy. Very similar to Pfitzer Juniper, except that foliage is purplish in color. 18 to 24 inches, \$1.50.

ARIZONA CYPRESS

PHOTINIA (Serrulata). A large, handsome shrub with slightly curled, indented leaves. The new foliage in spring is a bright red. Best used around large buildings or for heavy landscape plantings. Not particular about soil or situation. Price each, 18 to 24 inches, \$1.50.

ABELIA GRANDIFLORA. 18 to 24 inches, \$1.50.

EUONYMUS JAPONICA. 12 to 18 inches, \$1.25.

JASMINE FLORIDUM. 12 to 18 inches, \$1.50.

NANDINA. 15 to 18 inches, \$1.25, 18 to 24 inches, \$1.50.

BAKER ARBORVITAE. Described on left page. 18 to 24 inches, \$1.50.

BERKMAN'S GOLDEN ARBORVITAE. Described on left page. 18 to 24 inches, \$1.50.

BONITA ARBORVITAE. Described on left page. 12 to 18 inches, \$1.50.

IRISH JUNIPER. Described or left page. 2 feet, \$1.50.

PFITZER JUNIPER. Described on left page. 18 to 24 inches, \$1.50; 2 to 3 feet, \$2.00.

MEMORIAL PLANTINGS

Keep the memory of our service men and women; plant a living memorial in honor of those who have so unselfishly served their country in this, the greatest of all wars.

There is a very active movement by such organizations as churches, Chambers of Commerce, American Legion chapters, civic clubs and fraternities to plant such memorials. It seems to us that such plantings on our home grounds in honor of our own loved ones will keep alive and reflect the beauty of life expressed by those who have given so much for our "AMERICAN WAY OF LIFE." Theirs have been such warm and active lives that a living memorial is more fitting than a monument of stone.

May we suggest that you plant a living memorial to your own loved ones.

SYCAMORE. Hardy and a fast grower. Reaches to very large size. Bark white, leaves large. 4 to 5 feet, each, \$1.00; per 10, \$9.00. 5 to 6 feet, each, \$1.50; per 10, \$12.50.

CHINESE ELM. Very desirable for quick shade. One of the fastest growing of all trees. Susceptible to root rot. 4 to 6 feet, each, \$1.00; per 10, \$9.00.

WEeping WILLOW. The arching branches of this tree, covered with slender leaves, make it a wonderful specimen for lawn or park. 4 to 5 feet, each, \$1.00; per 10, \$9.00. 5 to 6 feet, each, \$1.50; per 10, \$12.50.

LOMBARDY POPLAR. Beautiful columnar tree of fast growth. Stately and graceful. Subject to foot rot. 6 to 9 feet, each, \$1.00; per 10, \$9.00.

MULBERRY (Hicks). Bears for four months through the spring, covered with into the summer. The trees will grow to great height. The Mulberries are large and of good quality. Price each, 3 to 4 feet, \$1.00; 4 to 5 feet, \$1.25.

ALL TREES LISTED ABOVE ARE SHIPPED PREPAID.

All Trees and
Hedge are
Shipped
Bare Root

RED BUD

ORNAMENTAL FLOWERING TREES

FLOWERING PEACH. Double red, double pink, double white. Spectacular and truly beautiful in bloom. Why not get some of each of the colors? 3 to 4 feet, each \$1.00, postpaid.

RED BUD. Not many of these trees reach a height of more than 10 feet and the spread is about the same. Very shapely. Entire tree covered with soft, glowing, pink blooms before appearance of leaves. Leaves are large, dark green and lustrous. Each, 3 to 4 feet, \$1.00; 4 to 5 feet, \$1.25, postpaid.

PAMPAS GRASS

The tall fluffy silver white plumes makes Pampas Grass one of the loveliest of the early fall grasses. Grows 4 to 6 feet tall with long, graceful leaves. Withstands our drouthy climate remarkably well. Used as specimens, they are very handsome. Every yard should have this beautiful grass. Easy to cultivate. Evergreen. Our grass is supplied in strong, individual field-grown clumps. Price per clump, \$1.00, postpaid.

PAMPAS GRASS

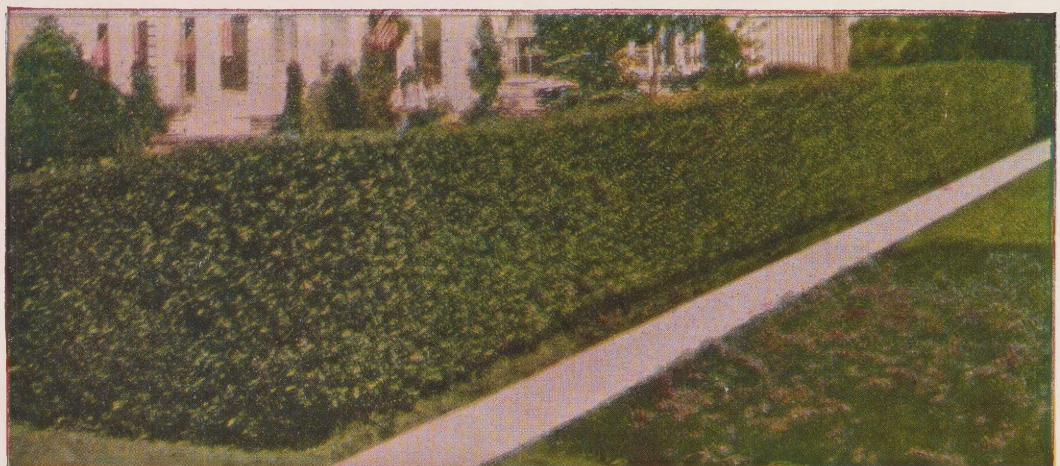

EVERGREEN PRIVET FOR HEDGES

These are hardy field-grown plants, heavily branched and which have stood in the field at least one year. The heavier and larger sizes have been in the field at least two years. They have a root system ready to make you a hedge at once.

AMoor RIVER. Very rugged and dependable and truly evergreen. Equally satisfactory for formal or informal hedge. 18 to 24 inches, each, 10c; dozen, \$1.00; per 100, \$8.00. 2 to 4 feet, each, 15c; dozen, \$1.50; per 100, \$10.00. 4 to 5 feet, each, 20c; dozen, \$2.00; per 100, \$14.00, postpaid.

JAPANESE LIGUSTRUM

A strong, upright growing evergreen with dark green glossy foliage. Can be trained as a small evergreen tree or it is ideal for tall hedges. Price each, bare rooted, 12 to 18 inches, 15c; 18 to 24 inches, 30c; 24 to 36 inches, 50c, postpaid.

AMoor RIVER PRIVET

PLANT **STUART'S** DELICIOUS FRUIT FOR TABLE and MARKET

Each year it is more apparent that on the soils of the Southwest, suitable for its growing, the apple is the most dependable and one of the most profitable of crops. The tree is long lived and hardy and less subject to late freeze than other fruits. The varieties which we offer are good producers in the Southwest and are favorites elsewhere.

KING DAVID. Ripe late in August. This cross of Wine-sap and Jonathan is the heaviest of producers. You will probably need to thin fruit on your trees. An intensely red, very highly flavored, fine shipping and cooking apple of medium size. You will be glad you planted the King David.

JONATHAN. Ripens first of September. This old favorite needs little description. The vigorous trees bear prolific crops of medium sized, very red apples of a flavor satisfactory for all purposes. Best for pollination of Delicious.

DELICIOUS. Ripens early in September. We offer you a superlatively red apple in this favorite variety. Surely "Delicious" comes to nearly everyone's mind when apples are mentioned. No other apple has the incomparable flavor or the unique five points on the bloom end. Reports on this apple are good from all apple growing areas of the Southwest, there being instances where apples of this variety raised in this section have been so large than three dozen made a bushel.

YELLOW DELICIOUS. Ripens with Delicious. Conformation much like Delicious but golden in color. Tree is good producer. Fruit of high quality, ships well and of pronounced flavor. Preference of many and often brings markets best prices.

DELICIOUS

STUART'S DELICIOUS CANNING PEARS

This fruit is almost a war casualty. Scarcity is nation wide. Many nurseries have none at all. We have been fortunate in obtaining a limited amount of root stock on which to propagate your trees. Naturally we are anxious to distribute them as equally as possible among our clients, hence the limit. The price is very reasonable.

GARBER. Ripens late in August. Sometimes called the Sugar Pear. The tree is a good producer and long lived. Fruit is large, of golden green color and spherical. A good eating pear. Tree vigorous and spreading.

KEIFFER. Ripens about October 1. Tree hardy, productive and blight resistant. Fruit very large. Excellent for canning and preserves. This pear keeps well and if picked when yellow, wrapped in paper and kept in cellar will be delicious at Christmas.

KING
DAVID

When hungry youngsters clamor for "something to eat"—give them a glass of cool sweet milk and a big, juicy apple grown right in your own orchard. Kids go for this delicious combination and it is good for them. Apples contain a good amount of the valuable vitamin C—the fresh fruit vitamin that helps build sound teeth and bones. They also contain vitamin A—the vitamin that helps to protect them from bad colds. So keep a bowl of fresh apples handy for between-meals snacking.

STUART'S HEAVY BEARING PLUM TREES

BRUCE. Ripens about May 25. One of the largest, intensely red and finest quality. Soft when full ripe and good eating plum but handles well commercially when turning from white to red. The strong, hardy tree bears well. A leader.

AMERICA. Ripens June 20. The leader among commercial plums. It is medium to large, yellow in shipping stage but reddens if left on tree until fully ripe. A strong tree which bears heavy crops of excellent canning and preserving fruit.

BURBANK. Ripens June 25. Prolific bearer, fruit delicious. A favorite eating plum. Cherry red with purplish tinge. Firm and a good shipper. Yellow flesh.

CHERRY PLUM

SAPA. Ripens late in June. This is the best of the Cherry Plums and is the house-wife's favorite cooker. Excellent for eating fresh. Dark purple color carries to seed. Makes prettiest and finest of jellies and pies, similar to cherries. Although the tree is dwarfish, it is a good producer and you will have great satisfaction in growing it.

STUART'S Proven VARIETIES OF PEACHES

MAYFLOWER. Ripe May 25. Good eating and roadstand peach. A sure, heavy bearer you will want. Red clingstone.

RED BIRD. Ripe June 1. An improved early Wheeler and much superior thereto. A heavy bearer of pretty, red fruit which stays on the tree well and has all the shipping qualities of the Old Wheeler. Has a good seed and is very frost resistant. Cling.

GOLDEN JUBILEE. Ripe June 25. We highly recommend this large, beautiful yellow peach of the Elberta type because of its good canning and commercial qualities. Dependable bearer. Freestone.

HALE HAVEN. Ripens almost as early as Jubilee. This tree is a very heavy bearer of the finest fruit. At times you will need to thin its fruit. Medium to large fruit with beautiful red cheeks and golden color under peel. Good shipper, finest flavor. Needed as pollinizer of Elberta. None better than this freestone.

BEAUTY. This well named peach is due to ripen about July 1 but may ripen before the Hale Haven. It is large and beautifully colored with red and yellow. Fairly good shipper. Fruit of this tree will appeal to those who like a tart flavor. Semi-cling.

HOESON. Cling. Ripe about July 10. Fast gaining favor because of its fine flavor, heavy bearing and excellent shipping qualities. The new pickle sensation and a quality eating peach. We are planting a lot more of this variety to our orchard this season.

J. H. HALE. Ripe about July 15. This lovely Elberta type peach is the largest grown in Central Texas. Probably because it is a shy bearer, it may be depended on to produce exhibition peaches for those wanting much. This popular peach has good flavor and is an excellent shipper. Freestone.

PEACHES—J. H. HALE

STUART ELBERTA (Illustrated on Front Cover). Ripe July 20. The Elberta is the standard, par-excellence of the yellow freestone peach, but there are more varieties of Elberta than there are of peaches. The Stuart Elberta is a large, yellow, red cheeked peach without any bitterness or strings. The shipper's dream peach. None better than Stuart's Elberta freestone.

ELBERTA CLING. This wonderful seedling of the Standard Elberta ripens with the Standard. Unsurpassed for flavor and shipping, it is a "Demand Peach" with housewives, as they want to pickle it at the same time they can the Elberta. Orchardists favor this peach and we are greatly increasing the number of this tree in our own orchard. Yellow cling.

FRANK. Ripe August 20. Bears well and is a good shipper. A quality peach that does well in East and Central Texas. Cling.

SURPRISE. Ripe in November. Well named, and one of the best for pickles and preserves. Edible quality good. You will want to plant this peach because it brings you so many good qualities so late in the year.

HARRISON OR TEXAS EVERBEARING FIGS

You will do well to plant this fruit even if it is not a practical commercial fruit in your locality. A few plants will supply fresh figs for eating and for preserves, even if they freeze to the ground in the winter, as the fig will bear from August until frost after freezing to the ground the previous winter. Why not raise the figs in your spare ground to make the preserves you are now buying to go with your hot biscuits and butter? Plant in your tight ground.

HARRISON OR TEXAS EVERBEARING. You may depend on this variety. It is very hardy and produces a prolific crop of bronze, smooth fruit of large size and excellent quality. We consider this variety the best.

EUREKA PERSIMMON

This beautiful tree is a joy to the eye and its fruit to the taste. The Eureka is THE commercial variety, being the prettiest, the best flavored and the most shippable of all the Japan persimmons. The beautiful tree is a sure bearer and prolific. The fruit is tomato shaped and fiery red when ripe. To handle commercially the fruit should be plucked when of orange color and firm as it ripens well after gathering and storing. Eureka fruit hangs on tree long after frost has got the leaves, making this tree one of the showiest ornamentals.

STUART'S DELICIOUS APRICOTS

Late freeze has always been the bane to this fruit, but it is so delicious that it is a favorite with all and unthinkable not to grow it. We offer excellent varieties that are the most dependable.

BRYAN. Ripens first week in June. The Bryan was originated at Dublin, Texas, several years ago and has been the most dependable producer since in Central and West Texas, having produced when others failed. Medium size, yellow with red blush, fiberless and good.

MOOREPARK. Ripens early in June. The largest and prettiest. Golden, with red tinge. Fine quality. Consider its dependability next to Bryan.

PLANT **STUART'S** GRAPES and BERRIES for JELLIES, JAMS, PIES

Before we took to the alphabet there was an expression used universally to denote perfection you remember it, "It's the berries." Lest we tire you we will use another, "Nough said." Let us remind you, however, that after a long winter without natural fruit it is a wonderful thing to go into the berry patch and gather the tender, juicy fruits of tantalizing flavor, which are the first to come. Your mother, your grandmother and your greatgrandmother knew what to do with berries, so we won't attempt to tell you. Here are the best.

BLACKBERRY (Early Wonder). This is a large, round, firm berry with hauling quality that will get it to market in good shape. It is a good bearer and does well in all sections. We recommend this berry and you will like it. **Per dozen, \$1.50; per 100, \$8.00, postpaid.**

AUSTIN DEWBERRY. Plant vigorous and crop prolific. The berries are large and black and good quality. This berry is a money maker. **Per dozen, \$1.00; per 100, \$5.00, postpaid.**

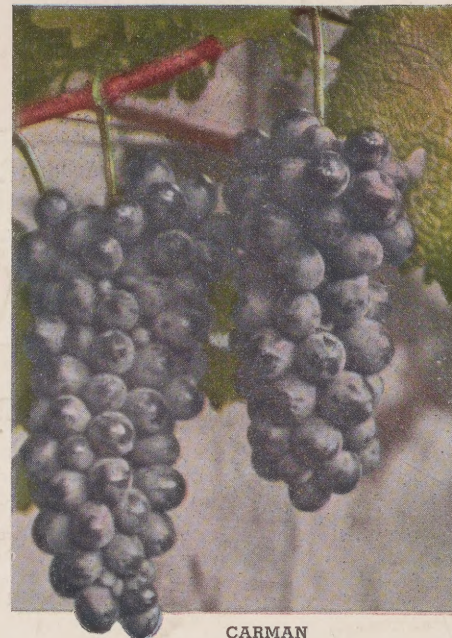

THE NEW FRUIT WITH A DIFFERENT FLAVOR

BOYSENBERRY. The ladies say "gorgeous" when expressing their opinion about this berry. Its deep purple color, large size and deliciousness are cause for such expression. All who eat this berry want more. The vine has a tendency to cling to the ground and should be pruned to turn it upward. **Per dozen, \$2.00, postpaid.**

The grape on an arbor is a comfort and a joy; in the vinyard it is a lasting source of profit.

CARMAN. This grape long ago stepped ahead of the Concord, which does not succeed well in the Southwest and to which it is similar. It bears large bunches of purple-black berries in profusion. The bunches are compact and haul well. It combines better than any other grape the attributes essential to make good jelly, good juice, good wine and good eating. More Carman are planted than all other varieties combined.

NIAGRA. The best white grape for the Southwest. Choice for eating fresh. Plant it for your table use and road-stand trade.

CARMAN
